

Mingde Yang (David Yang)

+46 70 49 36 846 | yangsilicon@gmail.com | Solna, Sweden
github.com/Silicon27

17-year-old software developer based in Sweden, focused on systems programming and compiler design in C++.

Professional working experience

- **Figgle — Software Engineer**
Mar 2026 – present
 - Worked at Figgle as a software engineer and technical advisor. Contributed to backend server development and delivered efficiency improvements across internal systems.
 - **Box & Bottle — Café Associate**
Jun 2022 – Aug 2022 (incl. PRAO)
 - Worked as barista, cashier, and dishwasher in a customer-facing environment.
-

Selected Projects

- *Aion* - Modular language ecosystem composed of 3 interdependent repositories (core compiler, standard library, tooling). Implements lexical analysis, recursive descent parsing, symbol resolution, and custom bytecode generation.
- *si* - Partial reimplement of C++20 standard library components (containers, iterators, allocators), used across all personal compiler projects.
- *gencia* - Python CLI utility for directory structure visualization (26k+ downloads via pip).

The above-mentioned and more may be accessed via github.com/Silicon27

Technical Highlights

- **Languages:** C++20/23 (primary), Python
 - **Tools:** CMake, Git, LLVM
 - **Languages (Spoken):** *English* (Fluent), *Swedish* (Fluent), *Chinese* (Fluent)
-

Education

- **Viktor Rydberg Campus Odenplan**
 - Natural Sciences Programme | 2024 – Present (Expected graduation year: 2027)
- **IES Solna**
 - Graduated 2024 — Technology Award Recipient
